## *About the artist*

My name is Blanca,  
I am an architect and an artist.  
I was born in Madrid in 1993.

**I paint stories.**

My current paintings are made using mixed techniques with different materials, mainly acrylic.

The strength of the textures that I apply and the power of the color allow me to create a bridge between a dream world and reality, verbalized through painting imaginary landscapes and life stories.

This process is a reflection of my architectural and artistic training where sensitivity to colors allows sensations to be communicated in each of the works, with completely colorful and subtle lines.
